

Science Knowledge Organiser **Animals including Humans (Term 1) Year 4**

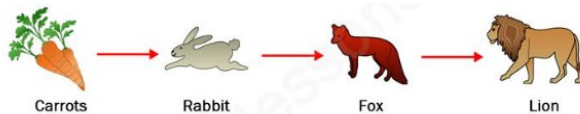

Our learning

In our science lessons this term we will be learning about animals including humans. This is part of our **biology** work in science.

We will learn about different parts of our digestive system and the **connections** between them.

We will learn what **food chains** are.

The digestive system

A simple food chain. The carrot is a producer, the lion is an apex predator.

Information

Humans have different kinds of teeth which have different jobs. For example, **canine** teeth help to **tear** food.

Too much sugary food can cause tooth **decay**.

The **digestive system** is the how the body breaks down food to help us have enough energy.

There are many important **organs** in the digestive system.

A **food chain** shows how each living thing gets its food .

As a scientist I will ...

- Identify **similarities** and **differences** when talking about my science work.
- Make **predictions** using **scientific language**.
