

Science Knowledge Organiser **Animals including humans (Term 5)**

Year 5

Our learning

In our science lessons this term, we are learning about animals including humans. This is part of the **biology** aspect of science. Through our learning we will be considering the **similarities and differences** between the stages of life for humans. We will learn how the body changes.

Information

The human body changes over time.

When humans are first born they grow quickly and learn many things in a short time such as how to walk, talk and eat solid food.

During **puberty**, the human body goes through **physical changes** to allow the body to **reproduce**.

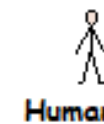

The human body can **deteriorate** as it gets older and elderly people might need help to look after themselves.

Vocabulary

Human– A member of the species of 'homo sapiens'

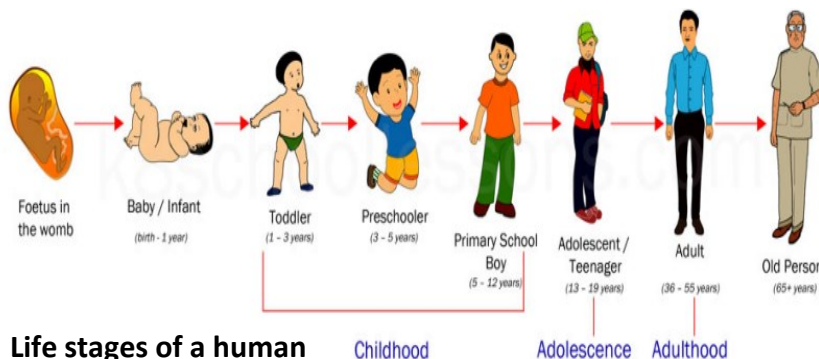

Puberty- Puberty is the process of physical changes through which a child's body matures into an adult body capable of sexual reproduction

Growth- To increase in size

As a scientist I will...

- Use **scientific** vocabulary to explain my ideas.

Changes during puberty
