

Science at Oakwood

Curriculum Materials:

Our curriculum is based upon : The
Aurora curriculum
Knowledge organizer
Pop quiz
Thinking square
Concept question

Curriculum Time:

We dedicate approximately 1 afternoon session of learning per class, each week to teaching science.

Science Overview

Our science curriculum is designed to equip children with the scientific skills and knowledge that will prepare them for life as an adult in the wider world. It is built on key concepts: making connections, cause and effect, pattern, similarities and differences. These themes allow children to build on previous understanding and apply them to new contexts. There are regular opportunities for investigative work across each year group and we advocate for children to ask scientific questions, make predictions, test their hypotheses and draw conclusions. Children make use of our full school environment and different resources for science.
